

FARRUKH NISAR

IT SUPPORT SPECIALIST & SYSTEMS ADMINISTRATOR

Location: Mellanbyplan, Sweden **Email:** farrukh.nisar@email.com **Phone:** +46 70 123 4567

PROFESSIONAL SUMMARY

Versatile and performance-driven Information Technology professional with over 9 years of educational and technical leadership in government and departmental roles. Master's graduate in Computer Science with deep expertise in systems administration, network infrastructure, hardware troubleshooting, and enterprise IT service delivery. Proven track record in orchestrating deployment projects, optimizing ticket workflows, and delivering tier-1/2/3 technical support across diverse IT environments.

TECHNICAL CORE COMPETENCIES

Systems Administration	Windows Server, Linux/Unix Administration, Active Directory, Group Policy (GPO), DNS/DHCP
Networking & Security	TCP/IP, VLAN Setup, Network Troubleshooting, VPNs, Firewalls, Wireshark, System Security
IT Operations & Support	Desktop Support, ITIL Framework, Asset Management, Ticket Resolution (Jira/ServiceNow), OS Deployment
Emerging Tech & Tools	Cloud Infrastructure Concepts, Edge Computing, Shell Scripting, PowerShell, System Optimization

PROFESSIONAL EXPERIENCE

Senior Computer Science Teacher / IT Specialist 2017 – Present

School Education Department | Government Sector

- Managed local school network infrastructure, workstation hardware deployment, and administrative IT support for staff and students.
- Administered user accounts, permissions, and network security policies across departmental computer laboratories.
- Diagnosed and resolved hardware, software, and peripheral connectivity issues with high efficiency and minimal downtime.
- Designed and executed digital training programs in computer systems, basic network protocols, and software applications.

System & Desktop Support Administrator 2015 – 2017

Technical & Educational Services

- Provided end-to-end technical support for 150+ user endpoints, managing installation, configuration, and upgrades.
- Maintained hardware inventories, software license tracking, and baseline security patching for all desktop assets.
- Implemented routine backup routines and system recovery procedures, ensuring continuous data integrity.

KEY TECHNICAL & INFRASTRUCTURE PROJECTS

Enterprise Active Directory & Network Infrastructure Deployment

2025 – 2026

- Standardized and deployed Active Directory Domain Services (AD DS) and custom Group Policy Objects (GPOs) across multi-departmental networks.
- Streamlined user onboarding and offboarding workflows, reducing account creation and provisioning time by 40%.
- Configured secure DNS, DHCP, and static IP allocation tables to maximize uptime and improve network management.
- Implemented strict access control lists (ACLs) and endpoint security policies compliant with organizational standards.

Tools: Windows Server, Active Directory, GPO, PowerShell, DNS/DHCP

IT Service Desk Optimization & Asset Management System

2024 – 2025

- Designed and implemented a centralized ticketing and IT asset tracking workflow to streamline multi-tier support requests.
- Structured issue categorization, resulting in a 35% improvement in first-contact resolution rates for end-user incidents.
- Cataloged and maintained full lifecycle records for desktop hardware, network switches, and licensed software packages.
- Authored standard operating procedures (SOPs), self-help documentation, and FAQs to minimize ticket volume.

Tools: Jira Service Desk, ServiceNow, Asset Tracking, Confluence, ITIL

Automated OS Deployment & Systems Migration

2023 – 2024

- Engineered custom system images pre-configured with security patches, network drivers, and enterprise productivity software.
- Automated software rollout schedules using scripting to eliminate manual installation steps across 100+ endpoints.
- Managed end-user data migration, profile transfers, and post-deployment validation, achieving zero data loss during upgrades.

Tools: SCCM, Windows PE, PowerShell, Batch Scripting, Disk Encryption

AI & Distributed Cloud Optimization Research Proposal

2025 – 2026

- Formulated advanced research methodologies focusing on AI-driven resource allocation and distributed cloud-edge optimization.
- Analyzed performance metrics, latency bottlenecks, and computational efficiencies for large-scale distributed systems.

Tools: Distributed Computing, Machine Learning Models, Cloud Infrastructure

EDUCATION & ACADEMIC QUALIFICATIONS

Master of Science in Computer Science (MSCS)

Conferred

Muslim Youth University, Islamabad

- Specialization in Distributed Systems, Computer Networks, and Advanced Software Architectures.

Bachelor of Science in Information Technology (BS-IT)

Conferred

University of Gujrat, Gujrat

- Focus on Systems Analysis, Database Management, Network Security, and Object-Oriented Programming.

LANGUAGES & TECHNICAL CERTIFICATIONS

Languages	English (Professional), Urdu (Native), Punjabi (Fluent)
Certifications	ITIL Foundation Concepts, Advanced Networking & Systems Administration (In Progress)
